

HOW TO FLUFF YOUR *Life-Like Christmas Trees*

STEP ONE: *work your way up*

Start with the bottom piece of the tree and insert the stem into the metal tree stand. This will help your fluffing because the tree is already balanced and upright! Start with the bottom branches and go around the tree as you adjust each tip, working your way up each branch. Repeat for each section of your tree!

STEP TWO: *use your resources*

Make things easier on yourself and utilize the packing pieces that hold your tree's branches in place when its boxed up! Notice in the picture to the right that he is slowly pulling each branch down from the plastic string. This will allow you to focus on each branch - one at a time - for a fuller, more fabulous tree.

STEP THREE: *relax and have fun*

Create special moments with your family while you fluff your Like-Like Christmas Tree and decorate your home for the holidays! Put on your favorite Christmas music, enjoy some delicious hot chocolate, and have fun!
